

School Type	Number of Schools (335)**	Primary Operators For Kibera Schools
Pre Primary School	144	NGO / CBO 37%
Primary School	147	Private 29%
Secondary School	31	Religious 27%
Vocational School	13	Government 4%

This map was produced by Map Kibera Trust by a citizen-led survey of schools. It was developed in conjunction with a website containing up-to-date school information in much higher detail than could be included in this printout. Please see [www.openschoolskenya.org](http://www.openschoolskenya.org).

The map creation process started with research conducted with parents, teachers, school administrators and officials. The team then went door to door to each school speaking to school leaders and teachers and collecting photographs, survey data, and GPS location of each school (all data is based on school self-reporting). We hope the map will serve as the beginning of a discussion on improving education in Kibera among all stakeholders. The website also contains schools data from other sources for comparison (such as Open Data Kenya), and we welcome additional data sets to include. Above all this is an open community resource.

With the advent of Free Primary Education in Kenya, public schools in the area were reported to have become overcrowded. This project found that the four public primary schools within the borders of the Kibera slum average 63 students per teacher. School leaders and teachers at other schools in Kibera noted that they address this overflow, averaging 25 students per teacher, but they often operate without resources other than school fees charged. Many parents are unable to pay these fees, however, leading to a shortage of basic supplies and textbooks.

**Total number of students in Kibera** 54,840\*  
**Students attending government schools** 27%\*  
**% of schools considered informal** 81%  
**Average school size** 179 students  
**Schools with reliable electricity** 28%

\* Includes schools slightly outside the boundaries of Kibera, serving both slum and surrounding areas.  
 \*\* schools that include more than one school type of pre-primary, primary, secondary, and/or vocational are counted separately, even if they occupy one campus.  
 Help us keep this map up to date! We know Kibera changes often, but our online maps and data are meant to keep up with changes. Get in touch anytime at [contact@mapkibera.org](mailto:contact@mapkibera.org).
